## Skills

---

**Languages:** C, C++, Java, Python, SQL, R, HTML

**Technical:** Git/GitHub, MySQL, Agile Methodologies, Linux, Android Development, VS Code, Figma, Windows

## Project Experience

---

**Deny and Conquer - Online Multiplayer Game** | *Java, [Git](#), JavaFX, [Demo Video](#)* Jul - Aug 2023

- Crafted an engaging **Java client-server** multiplayer game where players competed by coloring boxes on a grid, establishing a seamless connection and real-time online interaction earning a **100% grade**
- Integrated **frontend** and **backend** components, assuming a pivotal role in GUI construction using **JavaFX** and **socket programming** for communication of data, decreasing connection delay by **20%**
- Managed a team of **5**, utilizing my excellent **interpersonal communication** and **collaboration skills** resulting in meeting a tight **3-week** deadline

**Parenting App** | *Android Studio, Java, [Git](#)* Sept - Dec 2021

- Managed a development team of 4 to build an **Android app** for parenting by scheduling regular meetings and establishing expectations, decreasing communication errors by **20%**
- Demonstrated strong **problem-resolution** skills by overcoming language barriers and fostering effective communication within the team, resulting in a **grade increase from 70% to 100%**
- Utilized **Git** as the **Scrum** Master and Product Manager to issue tasks, create branches, and oversee merge requests/conflicts for every iteration, decreasing development schedule delays by **33%**

**Consumables Tracker Web Service** | *IntelliJ, Java, Spring REST API, [Git](#)* Sept 2021

- Developed a **Java GUI** web client for tracking food/drink expiration for my family by integrating **REST API** for seamless **server-client** data transfer and sync across devices, **eliminating family food waste by 50%**

**Cat Companion App - Hackathon** | *Python, Microsoft Office, [Git](#)* Feb 2022

- Led a team of 3 in the development of an interactive mental health companion app for the hackathon using **Python**, winning **1st place** and **\$100** for **best terminal app**
- Implemented functions for user input and processing of information to deliver helpful responses through a chatbot, increasing range of responses by **33%**

**Yelp Database Query App** | *MS SQL Server, Python, Pyodbc* Mar - Apr 2023

- Developed a **Python app** to interact with a Yelp database, implementing diverse database functions with **MS SQL Server queries** and maintaining integrity, resulting in a **100%** evaluation
- Created a hierarchical menu-driven interface that allows users to perform tasks such as logging in, searching businesses/users, making friends, and writing reviews on a database with **350,000+** entries

## Work Experience

---

**Event Planner Intern** | *Microsoft Office, [YouTube](#)* Summers 2020 - 2023

- Coordinated engaging events and parties resulting in a **15%** increase in weekly youth group attendance
- Efficiently **self-learned** video production within days, successfully shooting, editing, and screening daily camp videos which received **unanimous positive reviews**
- Spearheaded projects, speeding up the timeline by **20%** through effective planning and time management

## Education

---

**Simon Fraser University** Sept 2020 - Present

*Bachelor of Science in Computer Science*

*Current CGPA: 3.49*

**Awards:** Open Scholarship, Dean's Honour Roll, Hackathon - 1st Place

## Relevant Coursework

---

**Courses:** Data Communication and Networking, Data Structures and Algorithms, **Database Systems**, Operating Systems, **Software Engineering**, Object Oriented Design, UX Design, Requirements Engineering, Cyber Security
